

PORTFOLIO

25-30 Great Gulf Dr, Vaughan, Ontario

@Wintech-ca.com

“WINTECH sh.p.k” was established in March 2017, as a result of the request for the supply of doors and windows in the parent construction company “VLLEZERIT ASLLANI”, which was originally named “VA-AL-PLAST”.

This activity started with a symbolic number of 10 workers for the production and supply of PVC doors and windows only for the needs of the company, but with the development of the company, the demand for supply in the local and international market has increased.

As a result of this market demand, the idea arises to have a more competitive name in the market, where at the beginning of 2020 the name of the company is changed from “VA-AL-PLAST” to “WINTECH sh.p.k”.

Today, after a period near of 6 years, WINTECH counts:

- The technical office with 5 engineers-architects of this field,
- Procurement office with 4 professionals,
- Projects management with 6 architects,
- 100+ workers in production, where we see a development both in work force and in the advancement of machine technology for production.

As a result of these professional developments-advances and the demand for glass, in October 2020 the factory for the processing of all types of glass, which is named “WINTECH GLASS” and is equipped with the latest technology, begins work.

Now Wintech is a leading company in the field of production of PVC and Aluminum doors and windows, roller shutters, processing of different types of glass, glass facades, ventilated facades, fences and terraces, glass domes, Alucobond, etc.

The Wintech company also exports its products to various EU countries such as Germany, Austria, Belgium, Switzerland, Italy. The last year we start to export in USA and Canada.

Years of realizing the works 2021-2022.

WINTECH

windows - doors - glass - curtain wall

Founded in March 2017, WINTECH LLC emerged as a response to the burgeoning demand for door and window supplies within the construction company owned by VLLEZERIT ASLLANI. The firm was initially known as VA-AL-PLAST. With a modest team of just four employees, WINTECH LLC initially focused on meeting the production and supply needs of its parent company. However, as the business evolved, it became apparent that the demand for their products extended beyond the confines of the parent company, stretching into both local and international markets. Driven by this increasing demand and the desire to establish a more competitive presence in the market, the decision was made to rebrand the company. Therefore, at the start of 2020, VA-AL-PLAST was officially rechristened as WINTECH LLC, signifying its commitment to growth and market competitiveness.
